

# BAY LUXE

ROCK SOLID LUXURY

# VANITY TOPS

With the launch of the Baylux brand, Mar-Bal, Inc. brings 43 years of custom molding and compounding experience to the bathroom fixture space in the form of vanity tops.

Baylux is a NEW leader in the development of vanity tops made with solid surface composite technology. The durability and performance is unprecedented in the industry. Superior to china, cultured marble, steel, fiberglass, and acrylic, Baylux will not break, warp, spider crack, or rust and resists burns. Baylux vanity tops exceed the performance standards of C.S.A., I.A.P.M.O and ICPA.

As a hard, high-density, non-porous solid surface vanity top, Baylux vanity tops are extremely stain-resistant and easy to clean. Baylux brings to market the durability and luxury of granite and stone products with the competitive price tag of promotional tops. They are available in a range of neutral, soft-toned colors as well as a granite look in most popular sizes.

# COLORS & STYLES

Baylux offers a multitude of modern colors and styles to compliment any decor. Both solid and granite-like colors are available, as well as two different shape styles.

## SOLID COLORS

White	Bone	Bisque
-------	------	--------

## GRANITE-LIKE COLORS

Grey Granite	Desert Sand	Autumn Wheat
Pewter	Coffee Canyon	Warm Barley

## STYLES

Euro	Standard
------	----------

**Solid surface technology**  
(color and texture run all the way through)

**Durable, resistant to breakage and chipping**  
(fiberglass reinforced,  
unlike poured surface products)

**Resists burns and stains**

**Will not warp, spider crack, rust, or crack due to thermal shock around drain**

**Exceeds all performance standards**

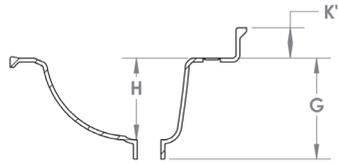

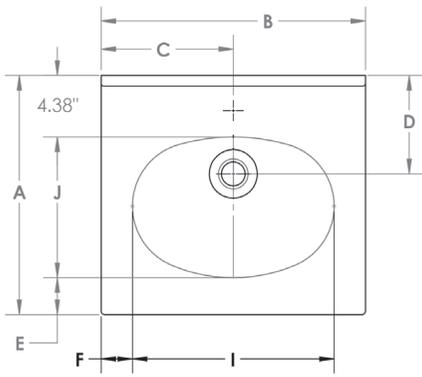

**Easy to keep clean**

**Easily accommodates all faucet styles:**  
single hole, 4" spread, 8" spread

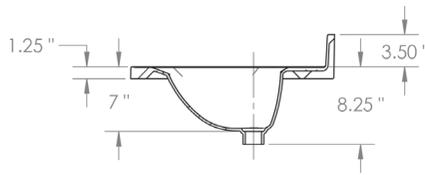

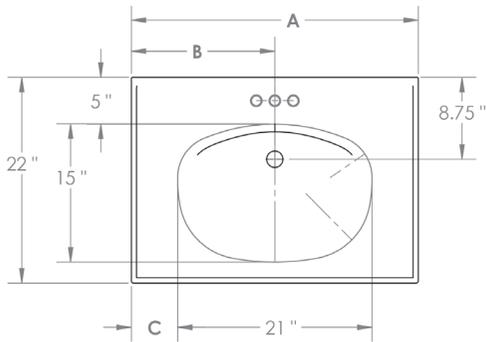

**Limited lifetime warranty**

**Large bowl size**

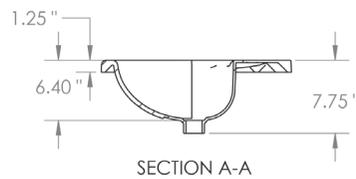

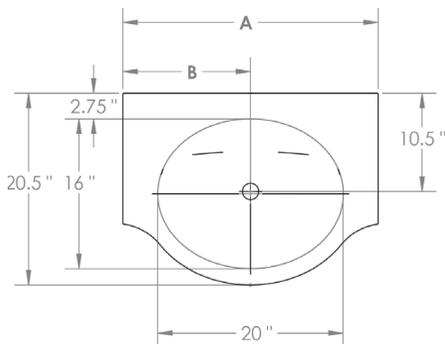

**No sealing and polishing required**  
as there is with stone tops

Founded by Jim Balogh and headquartered in Chagrin Falls, Ohio, Mar-Bal, the parent company of Baylux, is a compounder and molder of thermoset composite products. Since 1970, Mar-Bal has engineered and manufactured quality, customized materials and parts. Mar-Bal serves the appliance, electrical and industrial marketplaces from its four facilities in North America.

Mar-Bal, an ISO 9001:2008 registered company, has a portfolio of brands and proprietary products, and continues to develop innovative products while maintaining a commitment to client satisfaction and total value.

The entrepreneurial spirit continues at Mar-Bal under the leadership of the second-generation-Balogh family. Scott and Steven Balogh joined their father's company in the early 1990s and began growing the business through customer collaboration, engineering design and investments in innovation. In 2007, Mar-Bal opened a Research and Development Technical Center in Chagrin Falls that enables the company to focus deeper in providing their customers with thermoset composite solutions — part design, specialized material formulations and customized automation. The investments continued in 2011 with the addition of a PVD finishing line and adoption of Operational Excellence principles. Mar-Bal is clearly positioned to advance thermoset composites and provide their customers and partners a one-source solution.
