

	Base Year – 2021	Most recent Year - 2023
Scope 1 emission in Tons	224	229
Scope 2 emission in Tons	5265	4445

**Our CO2e intensity (per unit of sales) was reduce by 19 % from 2021 vs 2023
Our target is to reduce CO2e intensity (per unit of sales) by 50% by 2025**

We are committed to embarking on a decarbonization journey to mitigate the impacts of climate change. Our goal is to achieve a 50% reduction in carbon emissions by 2025. We recognize the urgent need to act and have already implemented several measures to contribute to this target.

To date, we have:

1. Conducted a comprehensive energy audit to identify areas of high carbon emissions and energy inefficiencies within our operations.
2. Implemented energy-saving initiatives, such as installing energy-efficient lighting and optimizing air compressor systems.
4. Implemented waste reduction and recycling programs to minimize our environmental footprint.

Moving forward, we are committed to taking additional steps to further reduce our carbon emissions, including:

1. Investing in energy-efficient technologies and equipment to improve our operational efficiency through Renewable Energy Credits.
2. Working on collaborating with suppliers and partners to promote sustainable practices throughout our supply chain.

We understand that the path to decarbonization is a journey that requires continuous effort and adaptation. We remain dedicated to playing our part in building a sustainable future and invite you to join us on this crucial mission."
